# skin sex and longevity

## skin sex and longevity pdf

Ageing or aging (see spelling differences) is the process of becoming older. The term refers especially to human beings, many animals, and fungi, whereas for example bacteria, perennial plants and some simple animals are potentially biologically immortal. In the broader sense, ageing can refer to single cells within an organism which have ceased dividing (cellular senescence) or to the ...

## Ageing - Wikipedia

A crocodile's physical traits allow it to be a successful predator. Its external morphology is a sign of its aquatic and predatory lifestyle. Its streamlined body enables it to swim swiftly; it also tucks its feet to the side while swimming, making it faster by decreasing water resistance. Crocodiles have webbed feet which, though not used to propel them through the water, allow them to make ...

## Crocodile - Wikipedia

About one hundred years ago humans doubled their life expectancy. This was a monumental feat, given that the number of years the average person was expected to live was a relatively constant number throughout most of human history.
