Food security is a measure of the availability of food and individuals' accessibility to it, where accessibility includes affordability. There is evidence of food security being a concern over 10,000 years ago, with central authorities in ancient China and ancient Egypt being known to release food from storage in times of famine. At the 1974 World Food Conference the term "food security" was ...

Cybersecurity involves preventing, detecting, and responding to cyberattacks that can have wide  
ranging effects on the individual, organizations, the community, and at the national level.  
Cyberattacks are malicious attempts to access or damage a computer system. Cyberattacks can  
lead to loss of money, theft of personal information, and damage to your reputation and safety.
