Note. The Power BI team is continually expanding the data sources available to Power BI Desktop and the Power BI service. As such, you'll often see early versions of work-in-progress data sources marked as Beta or Preview. Any data source marked as Beta or Preview has limited support and functionality, and should not be used in production environments.

Low-carbon power comes from processes or technologies that produce power with substantially lower amounts of carbon dioxide emissions than is emitted from conventional fossil fuel power generation. It includes low carbon power generation sources such as wind power, solar power, hydropower and nuclear power. The term largely excludes conventional fossil fuel plant sources, and is only used to ...
